

# Seema

Compliance intelligence for UK law firms. Built for COLPs.

Five features that turn the COLP role from *constantly worried something is slipping* into *I have evidence I'm on top of it* — and save the firm one to two days a month of compliance admin.

- 
- 01 Regulatory Update Intelligence — with cited sources**  
Continuous monitoring of SRA, ICO, Legal Sector Affinity Group and HMG sources. AI assesses whether each change applies to *your* firm specifically — and cites the exact provision so you can verify before acting. Per-staff acknowledgement tracking lets you chase the laggards.

---

  - 02 ICO Breach Response Engine — 72-hour countdown + AI draft**  
The moment a personal-data breach is logged, a 72-hour ICO clock starts. One click drafts a complete Article 33 notification body — categories of data, affected subjects, remedial steps, DPO contact. Removes the worst part of a breach: the panic-stricken first hour.

---

  - 03 SRA Annual Return — auto-fill plus section stepper**  
Every section pre-fills from real firm data: matter counts by practice area, AML high-risk client numbers, staff headcount, PII details, supervision register. A stepper walks you section by section to accept, override with a reason, or mark not applicable. Half a day of admin becomes twenty minutes of review.

---

  - 04 AI Conflict Checks & Matter Compliance Reviews**  
New intakes are checked against your actual matter history — prior parties, adverse parties, related companies, shared addresses — not a tick-box "no conflicts" form. Per-matter AI reviews flag CDD gaps, missed undertaking deadlines and supervision lapses before the file becomes a regulatory problem.

---

  - 05 Compliance Scan → Alerts → Remediation, end-to-end**  
Continuous scanning against the SRA Code of Conduct, Accounts Rules and AML obligations. Gaps surface with the rule citation, a recommended remediation and an owner — tracked through to closure. Inspection-ready Audit Packs and PII Renewal Packs send straight to the inspector or broker, with full delivery log.
- 

**See it on your own firm's data — book a 20-minute walk-through.**
